

FUJI FUJIPLA®

- For your home, office, shop...
- For digital camera prints, color prints...
- For proposals, catalogues, storing documents...
- For billboards, posters, POP, menu cards, price lists...
- For membership cards, ID cards...

Let's LAMIPACK it!

Cool, Classy, Convenient

FUJI LAMIPACKER
CUBICA4
A4 size photo Laminator
From name card size up to A4

FUJI LAMIPACKER
CUBICA3
A3 size photo Laminator
From name card size up to A3

With carrying bag & lamination films

Long power cord and Power cord storage space

Easy and quick lamination with short warm up time and fast laminating speed
Compact design and simple operation,
125microns+ very thick paper can be laminated
 stylish laminator of high quality, easy to use, store, and carry.

LAMINATOR

Preheating Time
3min-

Laminating Speed
360mm/min

Film thickness up to 125microns
125 microns

Temperature Control
Temp

Carrying Bag Attachment

Laminating Film Attachment

Features

- Shortest warm-up time in this class (3 minutes-)
- Laminates A4 size in 50 seconds
- Adapted to laminate 80-125 micron films + very thick paper (up to 0.27mm thickness)
- Laminates various sizes of objects, from name card size up to A4 (A3) size *CUBIC A4 laminates up to A4 size
- Operation is simplified with push button power switch and thermal control dial
- Finish is superb with attached rear tray
- READY lamp will extinguish when the required temperature is lowered
Set the lower temperature >> Lamp goes off>>The required temperature is achieved >>Lamp glows
- 2M long power cord enlarges range of use (0.5m longer compared to conventional company products)
- Storage space for power cord in the machine

Specifications

Model	FUJI Lamipacker CUBIC A4	FUJI Lamipacker CUBIC A3
Item No	LPD2317	LPD3217
Max. Laminating Width	230mm(A4)	335mm(A3)
Max. Laminating Thickness	0.6mm(including film thickness)	
Film Thickness	80-125microns	
Temperature Range	Room temperature,100°C-150°C(±10°C),Dial system	
Laminating Speed	360mm/min.(50Hz)	
Warm-Up Time	Approx.3-7min.	
Number of rollers	2	
Others	jam free function/Power,Ready lamp indication/power cord:2M	
Dimension(WxDxH)/Weight	447×105×105mm/2.4kg	540×121×121mm/4.0kg
Attachments	Rear tray,Carring bag, Cleaning paper,Users Guide, 10 lamination film(A4size)	Rear tray,Carring bag, Cleaning paper,Users Guide, 20 lamination film(A3size)
Power Source	AC220-240V(50/60Hz)	
Power consumption	400W	600W
Package size/Weight	490×158×168mm/3.2kg	580×186×188mm/5.4kg
Carton size/Number/Weight	510X340X380mm/4/14.5kg	660X405X220mm/2/12.5kg

*Warm-up time depends on room temperature.

*Specification may be modified without prior notice.

Our patent product

Effects

- As a result of lamination, the efficiency of durability and water resistance is improved and the laminated object is protected from scratches, stains and water.
- As laminated objects, such as documents or printed materials, are completely sealed and protected from oxidation of ink, color fade-out or changing colors is prevented.
- The printing gets more vivid as lamination process makes surface of the laminated object flat and smooth.
- By choosing lamination film, it is also possible to obtain UV cut effect or static-free effect.

Lamination Film

It is recommended to use our genuine FUJIPLA "CP-Leaf". Use of other films may cause trouble (e.g. jamming etc.)

Safety Warning

- △ Read the instruction manual thoroughly before operation to avoid danger and failure of the lamination.
- △ In the cases listed below, please stop operation, disconnect the ground connection and contact your FUJIPLA dealer immediately.
 - >The power supply cord or plug gets unusually hot.
 - >Strange smell or smoke comes out.
 - >Water or foreign objects get inside the machine.
- △ Warning and caution signs are omitted in the photographs run on this catalogue.
- △ Specification and appearance of the product may change for improvement reasons without notice.
- △ Maintenance parts for maintenance service are available for a minimum of 5 years after cessation of the manufacture of product.
