

DM550™ Specifications

Physical Dimensions (including drop stacker)

Length	1195mm
Depth	530mm
Height	380mm
Weight	27.1kg

Electrical

120/240Vac, 60Hz, 0.65-0.3A

Speed

Up to 160 letters per minute

Material Sizes

Minimum Material Size 88mm x 127mm

Maximum Material Size 254mm x 330mm

Material Thickness 0.2mm to 16mm

Envelope flap depth for sealing 25mm to 76mm

IntelliLink® Control Centre (ICC) easily detaches to simplify connection to a phone line.

Standard operating features

- Auto-dating
- Multiple tapes
- Low postage warning
- High value protection
- Original value resetting
- Water level indicator
- Seal only/no seal modes
- Low ink warning
- Password security
- Printer/PC interface

Options

- Standard envelope advertisements
- PPI facilities
- Power stacker
- Weighing platforms –
 - Integrated 2 kg platform
 - 7kg platform
 - 12kg platform
 - 35kg platform
- Differential weighing
- Accounting options – 100 or 300 accounts, Budget Manager or MeterNet™

AD550UK (10/03)

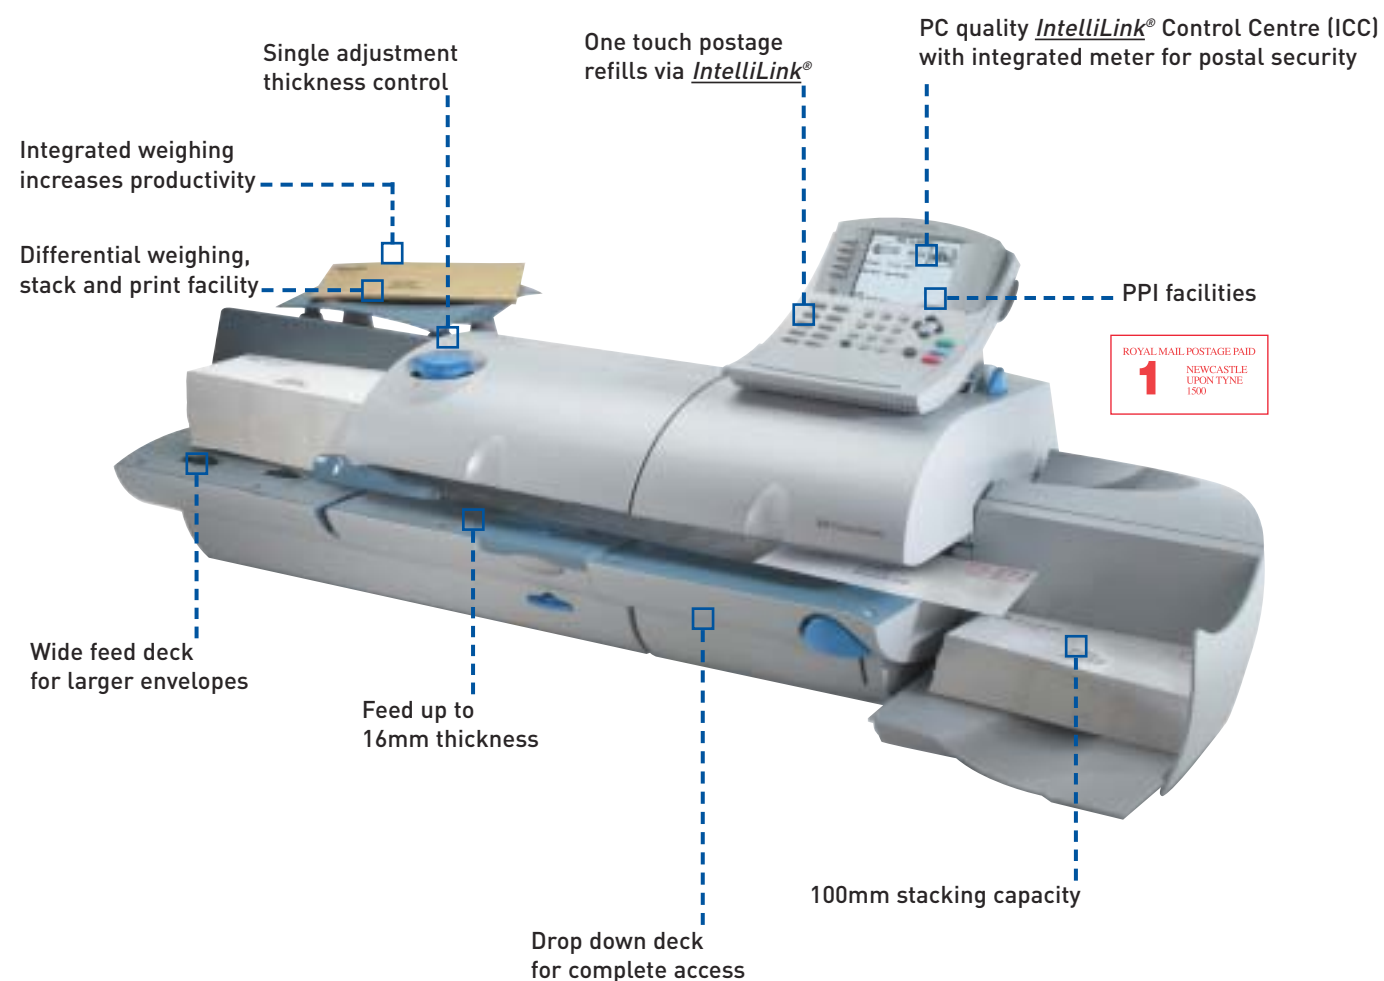

DM550™ Digital Mailing System with *IntelliLink*®

Pitney Bowes leading the way...

With mail in the UK increasing at a rate of 2.5% per annum and the liberalisation of the postal market under way – several operators have already been granted licenses for various postal sortation and delivery services – Pitney Bowes is leading the industry once again, with our revolutionary DM550™ mail finishing system.

We have responded to the multi-carrier environment by developing our very own automated Internet connection called *IntelliLink*®, which provides you with access to the postal services of your choice, automatic updates to postal rates and postage credits at the touch of a button.

In addition, the option of linking highly accurate weighing platforms to the system ensures the correct postage every time. And a single user interface control panel, with PC quality display and QWERTY keypad, makes these systems much easier to use than old style machines.

Streamlined technology helps the operator...

- **IntelliLink® for instant updates** – an in-built, automated Internet connection provides instant on-line access to postal rates, software upgrades and value added postal services. *IntelliLink*® is accessed via a standard phone line with all functions handled from the central control panel. It's so simple to use, needing no special skills or training.
- **Differential weighing** – weighing platforms up to 35kg are available for heavier parcels providing accurate electronic weighing, saving up to 20% on postage costs. In addition with our differential weighing technology, batches of mixed weight mail and parcels can be placed on the platform and the systems will calculate the value of each item when removed saving the operator a significant amount of time.

- **Streamlined processing** – Automatically feeds, seals, franks and stacks up to 160 envelopes per minute.

And it's better for business too...

- **Future proof solution** – The DM550™ is packed with industry leading innovations ensuring your investment is kept current. The control panel will handle value added services and alternative postal services when launched by future postal carriers.
- **No delays in getting postage refills** – Re-credit your meter with postage by simply pressing the button to activate the on-line connection to Pitney-Bowes **POSTAGE BY PHONE**. Get up to 55 days free credit, with **Postage Power** post now pay later facility.
- **Increased productivity** – innovative design features such as advanced detection sensors, auto-class select and auto-tape mode, maximise throughput, reduce stoppages and minimise maintenance requirements.
- **Automatic advertising** – Customise your messages by choosing from up to 10 slogans to promote your company and enhance the image of your mail.
- **Pre-date mail** – Mail can be pre-dated up to 31 days in advance giving the mailroom enough time to prepare mailshots.

Industry Innovation

- **No jams, crushed or torn envelopes** – the self aligning roller feed system keeps envelopes straight all the way through the machine, reducing stoppages and ensuring a perfect professional print finish. The drop down deck adjusts the gap between the rollers and the print/seal mechanisms to prevent envelopes from crushing.
- **Easy to use** – all controls are fully integrated on one clear control panel with user-friendly instructions to guide the operator through each stage of processing mail. The control panel swivels so that it can be seen from all operation angles. It easily detaches for connection to a phone line if required.

- **Regular jobs can be memorised** – up to 10 routine jobs can be stored as presets and automatically processed at the touch of a button.

- **Razor sharp digital printing** – Produce professional looking mail every time with the patented single inkjet head to give your mail that "open me" look.

- **No fuss accounting** – The DM550™ series offers you virtually unlimited accounting options. Up to 300 accounts can be stored on the control panel allowing you to track your postage costs. In addition, Budget Manager and MeterNet™ accounting options increase your accounting flexibility allowing you to set budgets, monitor mail efficiency and even turn you mailroom into a profit centre.
